

PREPARED FOR THE WORLD

Bellerbys College is more than a school – it’s an experience that prepares students for university and the global workplace

Bellerbys College is passionate about offering a rewarding education that not only encourages the best results but also brings subjects to life through enrichment. Going beyond extra-curricular activities, students enjoy timetabled workshops, meet top employers and enter national competitions.

Bellerbys Cambridge, Oxford, London and Brighton are four distinct colleges – each home to students from the UK and all over the world. Bellerbys Brighton is a modern boarding school for 13- to 18-year-olds and prides itself on taking a different approach to teaching. Bellerbys’ specialist colleges are found in Cambridge, Oxford and London and offer a chance to explore quality education in specialist fields, alongside like-minded students from more than 70 countries.

BELLERBYS COLLEGE BRIGHTON

Principal Simon Mower explains how an inspiring, supportive and caring environment leads to excellent results.

From my experience, living and studying alongside young people from across the globe helps students develop their cultural intelligence. Being an international boarding school, we see this benefit at Bellerbys Brighton every day and the excellent results that follow.

At the age of 13 and 14, it’s difficult for students to decide what GCSE subjects they want to study. That’s where our GCSE programme is different: by teaching each subject as a mini project in Year Nine, we are able to ensure our students really get a feel for their subjects. We then guide them towards the best combination depending on their desired field of study at university.

Each of our GCSE and A-level subjects are linked to unique enrichment activities that inspire students both in and outside the classroom. We believe that supporting academic learning through exciting new experiences is one of the greatest benefits a British boarding school education can offer.

My son joined Bellerbys’ GCSE Programme in September. **This enabled him to be challenged academically in his chosen subjects and guided by very experienced and dedicated teachers**

BELLERBYS COLLEGE CAMBRIDGE

Our college for science and engineering is the answer to the STEM skills shortage, writes principal Nicholas Waite.

Technology is an essential part of our everyday lives and a major contributor to the economy, so nurturing a Science, Technology, Engineering and Mathematics (STEM) education is vital. What is more, those in the field are in high demand among prospective employers.

Bellerbys College Cambridge teaches the engineers, doctors and scientists of the future. And as a specialist college for science and engineering, we provide excellent facilities and laboratories, highly experienced teachers and strong links with leading universities. I’ve seen for myself that students thrive when they can focus their efforts into courses that are tailored to their strengths and interests. So a specialist college, home to like-minded students, and all with the same drive and ambition is the ideal place to develop. The College also offers a balanced structure of enriched education and an active social life set within the cultural hub of Cambridge.

BELLERBYS COLLEGE OXFORD

A specialist college for art, humanities and law, situated in one of the cultural capitals of the UK, is the best way to stand out

writes principal, Charles Runacres.

Creative and ambitious students are drawn to Bellerbys Oxford. Specialising in art, humanities and law, we are privileged to nurture such enthusiasm, debate and innovation in our college.

We know that it can be difficult to understand how academic skills relate to the working world, so we believe tailored enrichment programmes and expert teachers are the key to sparking and encouraging young imaginations.

Imagine working with professionals in media, law, art and design, plus hearing from visiting university lecturers and members of parliament.

By immersing students in their subject through real-life projects, they not only become specialists, but also develop key soft skills – just the areas that make their student university applications through UCAS stand out and be noticed.

BELLERBYS COLLEGE LONDON

Principal Alison Baines says there is no better location for a specialist college for business than at the heart of one of the

world’s financial capitals.

Even as a young as 15 and 16, your children are thinking about what subjects they enjoy and the careers they relate to. Students choose Bellerbys London because it is a specialist business school, one that is located at the heart of the world’s greatest business capitals: London.

Our A level and foundation subjects include enrichment activities that directly complement our courses. It’s opportunities such as learning how the Bank of England sets interest rates, hearing speakers from HM Treasury and entering national business competitions that make our college exciting and different.

It’s about more than just top qualifications and the best teaching, it’s about letting students take charge of their careers and progress to the top UK universities.
