Work-Based Distance Learning Programmes

University of Lincoln in association with Study Group

Creating global access to higher education

An exciting new partnership between the University of Lincoln and Study Group is redefining access to higher education for professionals at a global level.

Following the growth in demand for flexible and accessible qualifications, the University of Lincoln, in partnership with Study Group, is working to help students overcome constraints and commitments to achieve their career goals utilising the latest technical developments to offer a truly global degree level education.

University of Lincoln

- One of the UK's leading new universities, Lincoln is renowned for its quality of education.
- Lincoln has rapidly risen through the university league tables, described as 'the most dramatic transformation of a university in recent times' by the *Times Good University Guide*. Lincoln has achieved the most progress of any institution over the last two years in the *Times* rankings.
- Students rated Lincoln's courses among the best in the UK for student satisfaction in the 2011 National Student Survey.

Meet our Students

"I have had a fantastic experience throughout my studies with the University of Lincoln. All the support that I received from Gary, Mike and Kevin, has resulted in my BSc (Hons) Engineering Management degree. The company I work for has asked me to join their new project in China, and thanks to my study at Lincoln, this has become possible for me."

Joep Houtenbos, Work-Based Distance Learning Graduate 2011

"My thanks to you and the rest of the team for getting me through the degree and for the generous support I have received. There have been some shaky times but without the flexibility of the programme, I would never have made it."

Mick Clabby, Work-Based Distance Learning Graduate 2010

Work-Based Distance Learning Programmes

The Work-Based Distance Learning programmes offered by the University of Lincoln are designed to give students and employers a competitive edge founded on professional experience.

Involving a range of key work-based management activities, the programmes allow employees to build on their existing expertise to achieve a degree. Delivered via distance learning, these flexible, work-based programmes can be completed within 13–24 months, depending on the individual's circumstances and experience.

The work-based distance learning model breaks down the barriers between working full-time and university training by supporting, enhancing and accrediting the knowledge, understanding and skills already acquired in the workplace.

Programmes available

BA (Hons) Business Management

This programme is designed to help students advance their careers by furthering their management competence and general employability. Lincoln is consistently rated amongst the top Universities for Business and Management education in the UK National Student Survey.

BSc (Hons) Engineering Management

This programme enables students to extend their skills, knowledge and vision and to provide them with opportunities for personal and career development.

Lincoln is a centre of excellence in industrial power and energy. In collaboration with Siemens, the University of Lincoln founded the first new School of Engineering in the UK for 20 years. World-leading, research-active staff provide links with a range of employers in the engineering sector.

BSc (Hons) Logistics Management

Developed in close collaboration with employers, this programme aims to act as a catalyst for change at both a personal and an organisational level. The programme is accredited by the Chartered Institute of Logistics and Transport (CILT).

Who are they for?

Each programme is designed to meet the needs of employees in any business who want to upgrade their operational skills and progress their qualifications to degree level. The minimum entry requirement is an HND or equivalent, with either:

- Considerable work-based experience.
- A completed work-based modern apprenticeship.

Benefits to students and employees

Fast and flexible

Students have up to two years in which to complete these part-time top-up degree programmes and will therefore be able to fit them around any pre-existing commitments.

Expert advice

Students and employers benefit from access to field-relevant experts, able to advise on work-based projects.

Builds on prior knowledge

Programmes capitalise on the high level of skills and learning demonstrated daily in the workplace.

Individually tailored

Learning is structured around a student's current role, allowing lessons learnt to be applied in real time to relevant projects.

Four intakes

Students can join the programme at four points throughout the year; August, November, February and May. This allows students to get their qualifications underway when it's convenient to them.
