Welcome to your University

TOP 10 FOR PAID WORK PLACEMENTS IN ENGLAND

All our undergraduate courses offer work placement opportunities, giving you a fantastic insight into your chosen industry and real-world experience.

94.9% GRADUATE EMPLOYMENT

The University has a great record of graduates going straight into employment or further study after their degree.

TOP 10 IN ENGLAND FOR TEACHING QUALITY

All of our academic staff are professional teachers, which means they are focused on teaching you the skills you'll need when you graduate.

88% STUDENT SATISFACTION

Overall student satisfaction at the University is higher than the national average and satisfaction has grown 3% on the previous year.

The Careers and Employability team has two people completely dedicated to strategy and guidance for international students, from explaining the UK job market to offering the same workshops and one-to-one sessions available to all students.

Surveys of employers, graduate employment rates and support offered by the careers service all helped the University achieve this 5 Star ranking.

You’ll have the perfect opportunity to make new friends, learn about different cultures and join in with the many campus events.

The University is ranked the best place in the world for international students to study and continually invests in facilities, support and societies.
Welcome

“I am privileged to be the Chancellor of the University of Huddersfield. This is a dynamic University, one where I have been a regular visitor for many years, working on a number of projects that go to the core of this University’s objectives and origins. When facing the decision of which university to join I can think of no better university where, from personal knowledge and experience, you will benefit from a combination of academic experiences and the development of relevant employability skills giving you the best preparation for the world of work. I shall be continuing the tradition of the Chancellor of the University of Huddersfield, where students are at the centre of all our thinking.”

HRH The Duke of York, KG
Chancellor
Your International Study Centre

The International Study Centre (ISC) will help you take your first step towards a successful career in your chosen industry.

Based at the heart of the University of Huddersfield’s campus, the ISC provides degree preparation programmes that are specifically designed for international students.

Our courses will prepare you for the challenges of degree level study and equip you with the academic knowledge, study and English language skills you need to succeed at the University of Huddersfield.
Welcome to your University
Myronne  
INDIA

International Foundation Year – Computing, Engineering and Science
Now studying: Computer Systems Engineering BEng(Hons)

“I’m an international student studying at the University of Huddersfield. Currently I am working as a part-time sports centre assistant at the university gym and also working for the 3M Buckley Innovation Centre.

“Coming to the UK was a challenge, but my parents always told me to do everything with an open mind and that is exactly how I approached it. At first it was a struggle but then slowly turned out to be just like home. None of this would have been possible without the tutors at the ISC and the basketball team, to whom I am greatly thankful. I believe the ISC gave me a great start, helping me to settle in, get used to learning in a new way and make some great friends.”
Let us tell you why!

Hannah
International Foundation Year – Art and Design
Now studying: Fashion Communication and Promotion BA(Hons)

“Huddersfield has a beautiful environment and is surrounded by some very attractive countryside. I believe my Foundation year will certainly help me when I start my degree. I have a specific goal of becoming a fashion buyer after I graduate and I am hopeful that a degree from the University of Huddersfield will help me achieve this.”

Amen
International Foundation Year – Business and Law
Now studying: Accountancy BA(Hons)

“As soon as I arrived in Huddersfield I really liked the University campus and fell in love with the Huddersfield town landscape. I think Huddersfield is very student-friendly and nice.

“Staff at the ISC and the University are always willing to help and I have really enjoyed being part of the Freshers activities, especially the International Food Fair! I am confident that my degree from the University of Huddersfield will help me fulfil my ambition to qualify as an accountant.”
Ahmed Ali

PAKISTAN

Vauxhall/General Motors

“The biggest benefit of a one year work placement is the impregnable lead you get at the time of graduation over those who don’t do a placement. The experience you get by doing a placement is unmatchable, as a student you wouldn’t realise what huge impact it makes on you when coming back to final year and afterwards. It’s not only making you more marketable after graduation, it also helps you in getting the right approach towards study. For me it has unlocked so many mysteries about industry that used to tangle in my mind.

“It has shown from this year that cramming books, reading theories and getting straight As in modules wouldn’t alone assure you success in life. You still need to work hard and succeed within a manufacturing and engineering environment.

“From having a placement within such a large and global organisation, I think that I have had an invaluable manufacturing and engineering linked experience at the company. Not only have I learnt the ins and outs of the car manufacturing industry, I have had the insight of working with people from all different departments such as Manufacturing Engineering (M.E.), Supply Chain, World Facilities Group (WFG), Quality Assurance (Q.A.), Human Resources (H.R.) etc. and seen how they work with each other.”
Two careers advisers for international students

The Careers and Employability Service on campus has two specialist advisers for international students and they are here to help you with all your employability needs. Workshops, one-to-one appointments and links to employers all make up an invaluable service that will help you understand the UK job market and your options after university.

Laura Trotter
Careers Adviser (International), Careers and Employability Service

“All students have the same access to resources but we understand that some international students have additional requirements. We help them with their career direction and offer workshops, discuss their options for remaining in the UK and help them understand the UK market. We also help them find part-time work and talk about the importance of developing global networks if they want to go back home for work.

“For me it’s all about the student; meeting them face-to-face and seeing them progress. That progression could be developing confidence, supporting them to contact employers or helping them to decide their career direction. It’s not all about getting them into that job, it’s about raising their aspirations.

“We encourage students to take control of their own careers.”

Ummey Hany
Molecular Plant Pathologist, Food and Environment Research Agency (FERA)

“My career goal is to build a research based career, and I am on the track in achieving that. I would like to give all the credit to the University of Huddersfield which actually helped me in getting access into the UK job market as well as remodelling me to find my feet in a very different work place than my country with confidence.”
The University of Huddersfield is among the UK’s top providers of ‘sandwich’ courses, which are developed in conjunction with global employers and industry.

You will have the opportunity to undertake a 12 month paid work placement as part of your degree – many of our students return from their placement with sponsorship and the offer of a permanent job from their host company.

Beatrice Boico  
Hewlett-Packard

“From my perspective, a work placement is a great opportunity for students to get involved in real life experience beyond university classrooms. However, what is more important is finding an internship that will make one year of your life unforgettable.

“Spending 13 months with world’s largest IT giant in the middle of its turnaround has been an astonishing experience. HP does not simply run a placement programme, it offers once in a lifetime opportunities. As an intern community of 70+, not only are we here to learn and grow, we are valued and trusted employees.

“We are given a great deal of independence and responsibility and are able to contribute and critically question ideas. The friendly and supportive environment helped us not only build business knowledge, but also confidence to face problems, manage deadlines and deliver consistent outcomes.

“The whole work experience indeed transforms you as a person. You master the art of networking, learn to set realistic goals, have an open attitude, make mistakes, and, last but not least, have a lot of fun!”
Top 10 in England for work placements*

Johnny Poon   HONG KONG
Senior Warehouse Assistant, UPS

“The University gave me the opportunity to have work experience with DHL during my studies. Now, as a graduate, I have gained employment with UPS which is giving me valuable career experience.

“UPS provided me with different global experiences in the logistics environment. As a Senior Warehouse Assistant, I deal with customers as well as handling daily operations.

“My daily operations include a whole range of documentation related to shipping, storage and invoicing. Working in a busy environment is very challenging and enables me to improve my time management skills and allows me to handle my work tasks priorities. In 2013, I won the accolade of ‘Best Warehouse Employee’.

“The University of Huddersfield enabled me to combine both education and work experience in order to make my transition into the workplace a lot smoother.”

Galib Al Nayim   BANGLADESH
Front Office Rooms and Revenue Supervisor, JW Marriott

“I have always believed in the benefits of the best quality education. Hence I decided to improve my skills by undertaking a Hospitality Management degree at the University of Huddersfield.

“This whole experience helped me to develop my technical and educational knowledge, which supported me to become more confident and gave me the opportunity to fully discover my ability and perform as the best.

“The University provided me with a great quality of education in the Hospitality Business field, which helped me to get a placement in the USA in year 3. I had an amazing time during the split internship programme, which helped me to achieved two different work experiences by working in platinum golf clubs in Florida and New York.

“After I came back from my placement, in the final year the module tutor gave me amazing support for all types of hospitality projects and dissertation, and through that I have learnt new skills by working on various projects.

“The course was so helpful and the University tutor prepared me very well in communication, and theory in Hospitality Management, which helped to get a graduate job with JW Marriott, Indianapolis USA.”

*Higher Education Statistics Agency, 2013/14
Ali
PALESTINE
International Foundation Year - Computing, Engineering and Science
Now studying: Mechanical Engineering MEng

"With a compact town centre that has a lot to offer, from shopping centres to nightlife, Huddersfield defines the best student environment.

“The University has great facilities, especially for my course. Having hands-on experience in workshops and visiting manufacturing facilities maximises the thrill and experience. It makes me feel confident and prepared to start my career after graduating.”
Aftab Afzal

Electronics Engineer, Rolls-Royce

“My Electrical Engineering degree proved invaluable for developing my skills because when you start your first job it can often take time before you are given the responsibility to work on the high profile projects. But because of their confidence in the skills I had obtained from my degree here at Huddersfield, from day one, they have had me working on the important assignments, which is great.

“I have been involved in certification of Trent XWB EEC which has been installed on Trent XWB Engine for Airbus A350. The Rolls-Royce Trent XWB, specifically designed for operation on the Airbus A350 XWB family, is the most efficient large civil aerospace engine ever produced.

“If you are a non-UK national this can often prove very difficult but with the help of the University’s Computing and Engineering Placement Unit, in the third year of my BEng degree I took part in a really successful one-year work placement as an industrial engineer where I got hands-on experience in my chosen industry.

“This shows just how successful the University is at helping students get into work during and after their studies.”

Shin-Wei Beh

Distribution Planning Executive, British American Tobacco

“I chose Logistics and Supply Chain Management as my degree because I was aware of the potential within the logistics industry in the future economy within most of the business sector. I was confident that the University of Huddersfield would equip me with a superior qualification as a logistics graduate.

“The course covered a wide range of topics and theories and the well-established Transport and Logistics department was capable in guiding my opportunities to success in my career.

“The course also offered an option of a sandwich year – 12 months out in the industry. I joined GlaxoSmithKline Consumer Healthcare Sdn Bhd (GSK) in Malaysia during my placement year. A sandwich year gave me the opportunity to apply my logistics and supply chain knowledge as well as providing mental and physical preparation before stepping into the ‘real world’.”
Supporting your future career
The Careers and Employability Service is committed to developing the employability of our international students at the University of Huddersfield. We offer you a range of support whilst studying at the University including targeted jobs fairs on campus. You can also discuss your career options with experienced, professionally qualified advisers who work with up to date information and have strong links with employers.

The Careers and employability service has two dedicated members of staff who are specialists in working with international students:

**Careers Adviser (International)**
- Delivers career development for the international student cohort across the University.
- Offers one-to-one guidance appointments.
- Helps students to find jobs in the UK and overseas.
- Supports students through the application process for graduate roles from CV checks to interview technique.
- Runs sessions in collaboration with academic schools.
- Runs a dedicated central workshop programme for international students covering everything from the UK graduate recruitment process to how to develop global networks.

**Internship Co-ordinator (International)**
- Supports international students to find and apply for work experience opportunities whilst they are studying at the University.
- Maintains strong links with employers and business networks both nationally and internationally to boost the profile of students at the University.
- Manages The Huddersfield Internship scheme (T.H.I.S) offering paid 10-week internships with local companies across a range of sectors exclusive to our students.
- Supports the University Jobshop which provides part-time work for students, graduate jobs and careers fairs.
- The University of Huddersfield is a supportive institution with a global mind-set and qualified expert staff to help you with your employability needs. We enable you to make informed choices when it comes to your career and we keep up to speed with national and international trends and employers to provide resources to help you to get where you want to be in life.

**Award-winning Careers and Employability Service**
- Career guidance
- One-to-one appointments
- Finding and applying for jobs
- CV checking
- Careers Fair
- LinkedIn workshops
- Interviewing techniques
- Assessment centres

**EmployableMe**
Our Careers Service offers this innovative approach to supporting your career planning and employability goals.

**Earn while you learn**
Our Careers and Employability Service’s free online JobsShop can help you find part-time work whilst you study, internships and graduate vacancies. You will also have access to a range of careers events including presentations, skills workshops and our annual Graduate Jobs Fair, which attracts a range of local, national and multi-national employers.

---

*94.9% graduate employment*

*Destination of Leavers from Higher Education Survey, 2013/14*
Every single member of the University’s teaching staff is a Fellow of the Higher Education Academy, a national organisation that recognises teaching excellence in the UK.

The University has over 100 professors with leading research and academic publications.

Research leads our curriculum.

University staff have expertise across an impressive range of disciplines and specialities and are known for their commitment to innovation, entrepreneurship and knowledge exchange. Their passion for working at the cutting edge inspires collaborators and students, winning support from major funders of research in the UK and around the world.

Top 10 in England for teaching excellence*

The University of Huddersfield is dedicated to teaching excellence, so you can be confident that you will be taught by highly qualified and experienced teaching staff who are leaders in their fields.

Tabriz  BANGLADESH

International Foundation Year – Computing, Engineering and Science – ‘Outstanding Student of the Year’. Completed: Mechanical Engineering BEng(Hons) with one year work placement at General Motors UK Ltd (Vauxhall Motors) – ‘Winner of Chancellor’s Award 2014’. Now studying: PhD

“The main reason of choosing the University of Huddersfield was its high quality teaching staff and the strong links with leading automotive companies. Huddersfield provides a study friendly environment. In my view it’s a fantastic town with all the necessary facilities.”

* Sunday Times, 2013
Inspiring, innovative, international

Professor Xiangqian (Jane) Jiang
Director of UK EPSRC Centre for Innovative Manufacturing in Advanced Metrology

Jane began her career as a very young apprentice and spent 20 years in the Chinese automotive industry finishing her industrial career as a fully qualified Engineer. In 1990, she started her academic life as an MSc student. She obtained her PhD in measurement science in 1995. She was awarded a Chair in 2003, a DSc for precision metrology in 2007 and the Director of the EPSRC Centre in Advanced Metrology in 2011. Jane possesses both industrial and academic backgrounds in measurement science and precision engineering and enjoys creative research moving the subject forward.

Jane’s research involves two major aspects: optical interferometry technology for fast on/in-line surface/geometry measurement; and mathematical modelling with characterisation technology for surface metrology. Besides this, she enjoys philosophical research in this subject area, successfully leading a Paradigm Shifts Review in Surface Metrology (Proc. Roy. Soc. A, 2007) and a 2011 Royal Society Discussion Meeting “Ultra Precision Engineering – from Physics to Manufacturing” (Phil. Trans. R. Soc. A 2012).

Jane has published over 230 papers, author/co-authored eight books and several patents on measurement science/surface metrology. Currently, she holds a prestigious Frontier Research Programme (Advanced Scheme) sponsored by the European Research Council for well-established world-leading researchers. She is a principal member of ISO/TC 213 and BSI TW/4, as well as an Advisory Member for the UK National Measurement System.

Jane was awarded a Royal Society Wolfson Research Merit Award and the Outstanding Asian Woman of achievement Award in 2006. She is a Fellow of the Royal Academy of Engineering (FREng), a Fellow of the Institute of Engineering Technologies (FIET), a Fellow of the Royal Society of Arts (FRSA) and a Fellow of the International Academy of Production Research (FCIRP).
In the last 10 years we have invested more than £100 million in the development of our attractive town centre campus and facilities. From state-of-the-art buildings and laboratories to innovative architecture along the canal that runs through the campus, we are continuing to invest in your future.
1 Business School
Contemporary and professional classrooms have made this £17 million Business School a stunning place to study since it opened in 2010.

2 Creative Arts Building
This striking building features a concert hall, cutting edge electroacoustic research studio, art and design studios and live recording facilities.

3 3M Buckley Innovation Centre
The Centre’s state-of-the-art facilities provide a unique environment for partnerships between businesses and the University.

4 & 5 Canalside East and West
Home to the new Engineering and Physical Sciences Research Council, Centre for Innovative Manufacturing in Advanced Metrology and state-of-the-art facilities for computing and multimedia, including Canalside Studios.

5 Lockside
This building offers specialist facilities for education, early years, teacher training and youth and community courses, including PC labs and mock classrooms.

6 Harold Wilson Building
Here you’ll find our main reception, as well as teaching facilities for our health-related courses including skills laboratories.

8 Student Central
Opened in January 2014, our newest building is home to everything you’ll need, from access to the library and support services to sport, leisure and cafes and restaurants all under one roof.

9 St. Paul’s Hall
As the University’s main concert venue this converted Georgian church seats up to 400 people and hosts over 70 performances each year.

10 The International Study Centre
The ISC is in the heart of the campus, close to all of the main facilities, so you will feel like a Huddersfield student from your first day with us.
Huddersfield is a safe and friendly place to live and there's a variety of high-quality and affordable accommodation for ISC students to choose from. From premium luxury to affordable options, we've got something to suit every taste and budget at our recommended student residences: Aspley House and Little Aspley House.

Aspley House and Little Aspley House

You'll have your own private room within an apartment shared with one or more students. Both residences are located just five minutes’ walk away from the ISC and the University.

You can enjoy the use of the private residents cinema, games room and gym facilities on site. For shops, restaurants and entertainment venues, the town centre is just a short walk away.

- En-suite bathrooms
- All inclusive bills
- Free 100Mb Wi-Fi throughout
- Contents insurance included
- Desks and storage
- Laundrette
- Residents cinema
- TV lounge
- Games room with pool, table tennis and consoles
- Gym
- BBQ area
- Bicycle storage
- CCTV and security entry systems

Accommodation options may be subject to change. For the latest information, please visit www.huddersfieldisc.com/accommodation

Our courses prepare international students for success at the University and beyond. We will help you achieve your end goal of becoming a confident and successful professional of the future.
Our courses will support you and prepare you for studying at the University of Huddersfield, so that you can successfully graduate and go on to work in your chosen career. We offer a whole range of programmes and subjects, so whether you are interested in creative arts, computing, engineering or business studies, there will be a course at the ISC to suit your needs and career goals.

Success starts at the ISC
Preparing for university is one of the most important things any student has to do. As a student at the ISC you will learn the academic and English language skills you need to be successful when you progress to your chosen degree at the University, and beyond.

Your first day with us
You are a student of the University of Huddersfield from the very first day you join us at the ISC. You will study and learn on campus, and have full access to University facilities such as the library, sports hall and Students’ Union.

Welcoming students from around the world
Being an international student means you are part of a wide community of different nationalities. At the ISC we know how to help you adjust to your new environment and make the most of your time in the UK.

Supporting you every step of the way
Many students at the ISC are new to the UK and study English language as well as academic subjects most relevant to their chosen degree. We monitor and support each of our students and encourage you to develop throughout your time with us.

Experience university-style teaching
The ISC introduces you to the style of teaching that you will experience at university. Taking part in tutorials, seminar-style classes and larger group lectures means you’ll be well prepared once you progress to the University.

Progression to your chosen degree
Joining the ISC guarantees that you will receive a conditional offer of a degree place at the University of Huddersfield. Once you successfully complete the course, and meet the required entry standards, you will proceed to study your chosen degree.

English language training
If you need additional English language training before you start your course at the ISC, you can first join our English Language Preparation programme.

Making the most of your time with us
You can take advantage of an exciting range of academic and social activities at the ISC. Over the last two years our students have visited Paris, Berlin, York, London, the Lake District and Alton Towers. We will ensure that you have the opportunity to apply your learning to real-world situations, make friends for life and enjoy your time as a Huddersfield student.
97% of International Study Centre University of Huddersfield students completed their programme, achieved the required grades and were offered a degree place at the University in 2014.
International Foundation Year

Khulod
QATAR

International Foundation Year – Computing, Engineering & Science
Now studying: Medical Genetics BSc(Hons)

"I started my journey with the International Study Centre at the University, which was a really good experience that I'll never regret. The ISC supports, leads and tracks student progress. The teachers were there every day to make things easier. Dealing with friendly staff and teachers while being an overseas student is the only thing you need to be confident – this is one of the many things that I learned. My ISC year prepared me well to begin my University course."
Ideal preparation for studying your chosen undergraduate degree

The International Foundation Year is a three-term programme of academic subjects, study skills and English language training that provides a path to degree study. The programme prepares you for undergraduate study in subject areas including Business, Law, Social Studies, Engineering, Computing, Science and Creative Arts.

Study structure
You can choose from these Foundation routes:
- Business and Law
- Creative arts
- Engineering, Computing and Science
- Hospitality and Tourism
- Management
- Social and Behavioural Sciences
- Transport and Logistics

All Foundation routes are modular in structure, with core modules common to each route, and subject-specific modules, each carefully designed to focus on the academic area most useful to your chosen degree.

English language training
You will need an IELTS of 4.5 (minimum 4.0 in writing) to start the International Foundation Year.

If you have an IELTS of 4.0 (minimum 4.0 in all skills) or equivalent, you can take one term of English Language Preparation (ELP) prior to starting the International Foundation Year. If you have an IELTS of 3.5 or equivalent, you can take two terms of ELP.

Progression to your degree
Once you successfully complete the programme, and achieve the required grades, you will join your chosen undergraduate degree at the University.

Key facts
Entry dates
January or September.

Course length
Three terms: January to August or September to June.

Assessment
End of module/term assessments: a combination of examinations and assessments of coursework, presentations and extended essays.

Continuous coursework: mixture of lecture classes, small group seminar work and directed self-study assessment.

Entry requirements
Academic: Good high school graduation grades or equivalent.

English language: IELTS 4.5 (minimum of 4.0 in writing), or equivalents.

Age on entry: 17 years of age or above in the September or October of the academic year you wish to study at the International Study Centre.

For more information about modules, term dates, country-specific entry requirements and tuition fees, visit hud.ac.uk/isc.

Severine
CAMEROON

International Foundation Year – Business, Hospitality, Law, Management Marketing, Transport and Logistics

“The best thing about the ISC is the way the teachers are able to explain ideas and get students to engage with various topics. I also find the campus to be very friendly with plenty of social activities. I’m looking forward to spending the next few years studying and living in this lively town.”

Leads to the first year of an undergraduate degree in:

**Accounting and Finance**
- Accountancy BA(Hons)
- Accountancy and Finance BA(Hons)
- Accountancy with Financial Services BA(Hons)
- Economics BSc (Hons)
- Economics with Politics BSc (Hons)

**Business**
- Business and Human Resource Management BA(Hons)
- Business and Journalism BA(Hons)
- Business Information Management BA(Hons)
- Business Management BA(Hons)
- Business Management and Leadership BA(Hons)
- Business Management with Finance BA(Hons)
- Business Operations Management BA(Hons)
- Business Studies BA(Hons)
- Business Studies with Environmental Management BA(Hons)
- Business Studies with Financial Services BA(Hons)
- International Business BA(Hons)
- Global Business Management BA(Hons)

**Law**
- Law (Exempting) Master of Law and Practice (MLP), LLB
- Law and Business BA(Hons)

These degrees are subject to change

**Real-world experience**
The University has strong links with local, national and international accountancy firms. They provide support through professional mentoring, delivering guest lectures and working with students to further their technical knowledge and employability skills.

**Inspiring and professional**
The iconic £17m Business School provides an inspiring and professional environment in which you can study and socialise. There’s even a mock court room where you can hone your debating skills and take part in mock legal hearings.
Modules

English Skills for Academic Study (ESUS 1, 2 & 3)
You will develop your English communication skills and learn a range of study skills, including writing and reading strategies, presentation and seminar participation, organisation of time and materials, meeting deadlines and responding to feedback.

When you have completed these modules you will be able to take notes and write essays in English. You will also have the confidence to give presentations, answer follow-up questions and contribute to seminar discussions.

Personal Learning and Thinking Skills (PLTS)
Personal, learning and critical thinking skills are essential for work and learning, and will prepare you to confidently enter university and later working life. The six groups of skills are:

- Independent enquirers
- Creative thinkers
- Reflective learners
- Team workers
- Self-managers
- Effective participators

This module is assessed by a project that focuses on your chosen degree subject and is an essential component of the International Foundation Year programme.

Core Mathematics
You will develop your knowledge and understanding of mathematical terms and techniques and apply these to solving problems, frequently drawn from practical and real life situations.

Investigating Business
You will develop an understanding of how businesses develop and adapt in a changing economic and business climate. You will be able to demonstrate that you can apply knowledge of the different forms of ownership and control to a specific business context and explain the reasons for change. You will also understand the role of different stakeholders and their competing and changing objectives. You will be able to explain the reasons for growth or decline of industrial sectors and be able to analyse location decisions, including some international comparisons.

The Competitive Business Environment
This module gives you the opportunity to consider some of the external influences that affect businesses and other organisations. By applying your learning to real business scenarios you will learn that businesses rarely have any control over these influences. You will also analyse how a business or industry has responded to competitive influences.

Legal and Financial Environment
You will develop knowledge, understanding and skills of how business organisations are affected by the law. You will explore the main types of legislation and consider how business activities are constrained by relevant legislation. You will also demonstrate the ability to interpret summary financial information and make judgements about business performance, including profit and loss statements, cash flow forecasts and balance sheets.
International Foundation Year // Creative Arts

International Foundation Year – Creative Arts
Now studying: Photography (sandwich) BA(Hons)

“I’m so happy that I made my decision to come here because Huddersfield feels like home. I want to thank the ISC for all the support and help they offered me every day and for teaching me how to become the photographer I want to be. I look forward to finding out which opportunities will appear for me in the future and achieving my goals as a photographer.”

Leads to the first year of an undergraduate degree in:

- Architecture/Architecture (International) (RIBA Part 1)
- Computer Games Design BA(Hons)
- Contemporary Arts BA(Hons)
- Contemporary Art and Illustration BA(Hons)
- Costume with Textiles BA(Hons)
- Fashion Communication and Promotion BA(Hons)
- Fashion Design with Marketing and Production BA(Hons)
- Fashion Design with Textiles BA(Hons)
- Graphic Design BA(Hons)
- Illustration BA(Hons)
- Interior Design BA(Hons)
- Photography BA(Hons)
- Product Design BA(Hons)

Links with creative industry
The University has developed strong links with the creative industry and commerce to provide students with the opportunity to work with inspirational organisations who lead the creative economy both in the UK and overseas.

These degrees are subject to change

Core Mathematics*
You will develop your knowledge and understanding of mathematical terms and techniques and apply these to solving problems, frequently drawn from practical and real-life situations.

In addition to the above five modules, you will study further subject-specific modules which will give you access to a wide range of progression degrees in the creative arts, including Art, Design, Architecture and Graphics.

Drawing
A series of exercises will be introduced each week in order to introduce you to a range of materials and develop confidence in drawing techniques. You will consider and evaluate the work of artists and designers. Emphasis will be placed on developing ability to record what is seen.

Visual and Perceptive Studies Project
The emphasis of this module is on the development of creativity and visual perception through exploration. You will have the opportunity to experiment with some of the media, processes and visual language associated with visual communication. You will develop the ability to move through initial research to development of ideas and refine a final outcome.

Art and Design History
As artists and designers have always looked to the past for inspiration and innovation, you will be introduced to the study of Art and Design History. You will develop knowledge and understanding of key movements within an historical context, providing a framework for your understanding of works of art and design. You will also develop research and skills in identifying, selecting and recording appropriate references for study.

* Students progressing to degrees in Architecture will take Pure Mathematics rather than Core Mathematics. See page 37 for module details.

Portfolio
Students no longer need to complete a portfolio as part of their application to the International Foundation Year. You will instead complete a portfolio as part of the Creative Arts route and will be assessed at the end of the programme.**

** Progression to your degree is dependent on passing the International Foundation Year and the portfolio. Students who do not pass the portfolio may be offered an alternative progression degree.

International Foundation Year // Engineering, Computing and Science

International Foundation Year – Engineering, Computing and Science
Now studying: Medical Biology BSc(Hons)

“I am presently studying Medical Biology at the University of Huddersfield. I started with the International Study Centre, the support we had there was exceptional. I wanted to get started with my degree right away but my agent suggested that I should start with the ISC. I reluctantly agreed but a few months into my programme I realised that I had made the right choice. Friendly staff and teachers are always ready to go over a particular point until it is well understood. My progression to a degree was smooth – the ISC prepared me for the course.”

Leads to the first year of an undergraduate degree in:

**Computing**
- Computer Games Programming BSc(Hons)
- Computing Science BSc(Hons)
- Information and Communication Technology BSc(Hons)

**Engineering**
- Automotive and Motorsport Engineering BEng(Hons)/MEng
- Computer Systems Engineering BEng(Hons)
- Electronic and Electrical Engineering BEng(Hons)
- Electronic and Electrical Engineering BEng(Hons)
- Electronic Engineering BEng(Hons)/MEng
- Electronic Engineering and Computer Systems BEng(Hons)
- Energy Engineering BEng(Hons)/MEng
- Mechanical Engineering BEng(Hons)/MEng
- Software Engineering MEng

**Science and Technology**
- Biochemistry BSc(Hons)
- Biomedical Science BSc(Hons)
- Chemical Engineering BEng(Hons)/MEng
- Chemical Engineering and Chemistry BSc(Hons)
- Chemistry BSc(Hons)
- Chemistry with Chemical Engineering BSc(Hons)
- Chemistry with Forensic Science BSc(Hons)
- Chemistry with Industrial Experience MChem
- Exercise Science BSc(Hons)
- Forensic and Analytical Science BSc(Hons)
- Medical Biochemistry BSc(Hons)
- Medical Biology BSc(Hons)
- Medical Genetics BSc(Hons)
- Music Technology and Audio Systems BSc(Hons)
- Nutrition and Public Health BSc(Hons)
- Pharmaceutical Chemistry BSc(Hons)
- Sport, Exercise and Nutrition BSc(Hons)
- Sport Science BSc(Hons)
- Surveying (Building Surveying) BSc (Hons)
- Surveying (Quantity Surveying) BSc (Hons)

*Students are required to achieve minimum 60% overall and 50% in ESUS3.

hud.ac.uk/isc
Modules

English Skills for Academic Study (ESUS 1, 2 & 3)
You will develop your English communication skills and learn a range of study skills, including writing and reading strategies, presentation and seminar participation, organisation of time and materials, meeting deadlines and responding to feedback.

When you have completed these modules you will be able to take notes and write essays in English. You will also have the confidence to give presentations, answer follow-up questions and contribute to seminar discussions.

Personal Learning and Thinking Skills (PLTS)
Personal, learning and critical thinking skills are essential for work and learning, and will prepare you to confidently enter university and later working life. The six groups of skills are:

- Independent enquirers
- Creative thinkers
- Reflective learners
- Team workers
- Self-managers
- Effective participators

This module is assessed by a project that focuses on your chosen degree subject and is an essential component of the International Foundation Year programme.

Pure Maths
You will understand and interpret linear and straight line equations, set theory and probability, statistics, linear programming, indices and logarithms and experimental laws.

In addition to the above five modules, you will study further subject-specific modules which will give you access to a range of progression degrees in the areas of Computing, Engineering and Science. Depending on the area you wish to specialise in, you will study a combination of subject areas.

For students following degrees in Engineering and Computing:

Applied Maths 1
In this module you will focus on topics such as vectors, velocity and acceleration, force and Newton’s Laws, friction, work, energy and power, projectiles, moments and centre of gravity.

Applied Maths 2*
You will focus on basic topics such as momentum and impulse, circular motion, rotational motion, simple harmonic motion, elasticity and gravitational and electric fields.

For students following degrees in Science:

Biology
This module will develop your knowledge and understanding of biology. You will cover population-biodiversity, organisms-exchange and transport, cells and molecular-biological molecules.

Chemistry
You will study formulae, equations and amounts of substance, atomic structure, bonding and structure, energetics, equilibria and kinetics. You will also cover redox systems, inorganic chemistry and the periodic table, organic chemistry and modern analytical techniques.

* Students choosing degrees on the Computing pathway will take the Physics module and not Applied Maths 2.

For students following degrees in Engineering and Science:

Physics
This module will enable you to:

- Recognise, recall and show understanding of specific physical facts, terminology, principles, relationships, concepts and practical techniques.
- Select, organise and present relevant information clearly and logically, using specialist vocabulary where appropriate.
- Carry out relevant calculations.

Devise and plan experimental activities, selecting appropriate techniques whilst demonstrating safe and skilful practical techniques.

- Events Management BA(Hons)
- Hospitality Business Management BA(Hons)
- Hospitality Business Management with a Modern Language BA(Hons)
- Travel and Tourism Management BA(Hons)

These degrees are subject to change

Exceptionally employable

The University has some of the best graduate employment statistics in the UK. Hospitality graduates from Huddersfield have a reputation for being highly competent and exceptionally employable.

"I wanted to study in the UK since high school. I chose the University of Huddersfield because of its high ranking and because it was suggested to me by my agent. I am sure that once I successfully finish my studies, getting a job will not be difficult."
**Modules**

**English Skills for Academic Study (ESUS 1, 2 & 3)**
You will develop your English communication skills and learn a range of study skills, including writing and reading strategies, presentation and seminar participation, organisation of time and materials, meeting deadlines and responding to feedback.

When you have completed these modules you will be able to take notes and write essays in English. You will also have the confidence to give presentations, answer follow-up questions and contribute to seminar discussions.

**Personal Learning and Thinking Skills (PLTS)**
Personal, learning and critical thinking skills are essential for work and learning, and will prepare you to confidently enter university and later working life. The six groups of skills are:

- Creative thinkers
- Reflective learners
- Team workers
- Self-managers
- Effective participators

This module is assessed by a project that focuses on your chosen degree subject and is an essential component of the International Foundation Year programme.

**Core Mathematics**
You will develop your knowledge and understanding of mathematical terms and techniques and apply these to solving problems, frequently drawn from practical and real-life situations.

**Investigating Business**
You will develop an understanding of how businesses develop and adapt in a changing economic and business climate. You will be able to demonstrate that you can apply knowledge of the different forms of ownership and control to a specific business context and explain the reasons for change. You will also understand the role of different stakeholders and their competing and changing objectives. You will be able to explain the reasons for growth or decline of industrial sectors and be able to analyse location decisions, including some international comparisons.

**The Competitive Business Environment**
This module gives you the opportunity to consider some of the external influences that affect businesses and other organisations. By applying your learning to real business scenarios you will learn that businesses rarely have any control over these influences. You will also analyse how a business or industry has responded to competitive influences.

**Legal and Financial Environment**
You will develop knowledge, understanding and skills of how business organisations are affected by the law. You will explore the main types of legislation and consider how business activities are constrained by relevant legislation. You will also demonstrate the ability to interpret summary financial information and make judgements about business performance, including profit and loss statements, cash flow forecasts and balance sheets.

International Foundation Year //
Marketing

“International Study Centre
at Huddersfield is very friendly and
everyone makes you feel welcome.
The town is filled with people from
different nationalities and it’s easy to
make friends. The foundation course
is giving me the best preparation to
go on to a marketing degree. When
I graduate I would like to go on to a
Master’s degree.”

International dimension
Huddersfield has a long tradition in delivering
marketing courses – it was the first UK university to
offer a recognised marketing degree. The department
has a strong international dimension which is
reflected in the programmes offered and the student
body which comprises of more than 120 different
nationalities.

“I applied to the International Study Centre because I wanted to get the basics right and improve my English. I feel that the teachers take care of the students and lessons are always interesting.

“Huddersfield is the perfect place as it is compact and comfortable, yet close to some big cities such as Leeds and Manchester.”
Progress to the second year of your chosen undergraduate degree

The International Year One is an intensive, three-term programme of academic subjects, study skills and English language training that is equivalent to the first year of an undergraduate degree. The course is designed for international students who are overqualified to study the International Foundation Year but under-qualified for direct entry to the first year of an undergraduate degree.

Is the International Year One right for you? It is if you:
- Are a university student already studying the first year of a relevant undergraduate degree in your home country.
- Have completed the first year of an HND or advanced Diploma in your home country.
- Have completed local high school with outstanding grades.
- Have completed an A Level, IB or International Foundation Year.
- Are a mature student with relevant experience.

Study structure
You can choose from two routes:
- Business, Management & Marketing
- Engineering

All routes are modular in structure, with core modules common to each route and subject specific modules designed to focus on the academic area most useful to your chosen degree.

English language training
You will need an IELTS of 5.0 (minimum 5.0 in writing). If you have an IELTS of 4.5 (minimum 4.5 in writing) or equivalent, you can take one term of English Language Preparation (ELP) prior to starting the course. If you have an IELTS of 4.0 (4.0 in writing), you can take two terms of ELP.

Progression to your degree
Once you successfully complete the programme, and achieve the required grades, you will join the second year of your chosen undergraduate degree at the University.

Key facts

Entry dates
September or January.

Course length
Three terms: September to June or January to August.

Entry requirements
Academic: Good high school graduation grades or equivalent.

English language: IELTS 5.0 (minimum of 5.0 in writing), or equivalents.

Age: 18 years of age or above.

For more information, including term dates, country-specific entry requirements and tuition fees, visit hud.ac.uk/isc.

International Year One // Business, Management and Marketing

When I researched my options, I realised that the University of Huddersfield is fully supportive of international students and this appealed to me. Now that I am living and studying here, I find the people very friendly and the place very peaceful which is suitable for me to concentrate on my studies. The ISC organised a day trip recently and it gave me a great opportunity to meet lots of new people and make friends.

These degrees are subject to change.

Dynamic learning
Located in a new £17m building in an attractive waterfront setting, the Business School is a dynamic academic community that aims to deliver an inspirational learning experience and pioneering research. The School is a major provider of business and legal education, with approximately 6,000 students.
Modules

**English Skills for Academic Study (ESUS 1, 2 & 3)**
You will develop your English communication skills and learn a range of study skills, including writing and reading strategies, presentation and seminar participation, organisation of time and materials, meeting deadlines and responding to feedback.

When you have completed these modules you will be able to take notes and write essays in English. You should also have the confidence to give presentations, answer follow-up questions and contribute to seminar discussions.

This programme gives you access to a wide range of progression degrees in Business, Management and Marketing. Depending on the area you wish to specialise in, you will study a combination of subject areas from the modules:

**Financial Environment**
This module will give you a basic grounding in financial and management accounting which will provide a basis for further personal development in work and further study, whatever career you decide to enter into. The module will progress from the understanding of the basic financial statements through to interpretation and critical analysis of these. The provision of internal information to aid management will also be covered, together with some of the fundamental techniques that are used for costing, pricing and appraising decisions.

**Legal Environment**
The purpose of this module is to introduce you to key legal aspects and their impact on business. The module introduces you to areas of employment and contract law and will develop your ability to apply legal issues to real organisations.

**Markets and Marketing**
This is a double module which will allow you to develop an understanding of the principles of Management Economics and Marketing. It will enable you to understand the behaviour of markets and the responses of businesses to that behaviour through their marketing activities. The module will also equip you with the confidence and knowledge to develop an understanding of marketing theory and practice and develop the skills to produce a well-researched marketing plan, through the application of relevant economic theories.

**For students choosing to study Business Studies or Business Management degrees:**

**Organisational Behaviour**
In this module you will develop and apply knowledge and understanding of structure, operation, the management of organisations and the motivation of people who work in them. You will relate your study to real organisational settings by applying theories in such a way as to suggest management actions. In doing so, you will explain how organisational performance can be improved through better use of people.

**For students choosing to study a Marketing degree:**

**Practical Marketing and Branding Project**
This module aims to develop your skills which are relevant to the varied demands of the marketing industry through practical application. You will develop descriptive, analytical and decision-making skills and transferable personal skills using the demands of the many sectors of the marketing industries within the UK as a vehicle.

You will work in the context of a branding project, and be introduced to brands, their evolution and reasons for their success. You will research current trends in branding, and use a case study of a leading brand, demonstrating an understanding of how companies create positive brand images and encourage loyalty.
International Year One // Engineering

Precious NIGERIA

International Year One – Engineering

“The ISC is a very friendly place to study and I have found the teachers are very approachable. Studying is not the only thing I am enjoying here – I have managed to learn some Arabic and have already made some great friends. The facilities are good and the fact that staff are always available is a great benefit to me. I am hoping to achieve a respectable grade in my degree which I believe will give me good job opportunities.”

Leads to the second year of an undergraduate degree in:

- Automotive and Motorsport Engineering BEng(Hons)/MEng
- Computer Systems Engineering BEng(Hons)
- Electronic and communication Engineering BEng(Hons)
- Electronic and Electrical Engineering BEng(Hons)
- Electronic Engineering BEng(Hons)/MEng
- Electronic Engineering and Computer Systems BEng(Hons)
- Mechanical Engineering BEng(Hons)/MEng

These degrees are subject to change.

Inspirational learning

The School of Engineering at Huddersfield delivers an inspirational learning experience and undertakes pioneering research with a practical focus. The School strongly believes in the quality of support it provides for students, employers and working partners.
Modules

English Skills for Academic Study (ESUS 1, 2 & 3)
You will develop your English communication skills and learn a range of study skills, including writing and reading strategies, presentation and seminar participation, organisation of time and materials, meeting deadlines and responding to feedback.

When you have completed these modules you will be able to take notes and write essays in English. You should also have the confidence to give presentations, answer follow-up questions and contribute to seminar discussions.

In addition to the above ESUS modules, you will study further subject-specific modules which will give you access to a range of progression degrees in Mechanical and Electrical and Electronic Engineering. Depending on the area you wish to specialise in, you will study a combination of subject areas.

This programme gives you access to a range of progression degrees in Mechanical and Electrical and Electronic Engineering. Depending on the area you wish to specialise in, you will study a combination of subject areas.

For students following degrees in Mechanical Engineering:
- Maths, focusing on knowledge, understanding and skills applicable to first year degree Engineering Mathematics, including algebra, functions, matrices, sequences and series, scalars and vectors, polar coordinates, calculus and probability.
- The mechanics of stationary and moving objects, including turning forces, stress and strain, Newton's laws, linear and angular motion, rotational dynamics and simple harmonic motion, heat transfer and fluid pressure.
- Operation of DC and AC motors, transducers and analogue to digital conversion. Also frequency sampling and basic Op-amp circuits.
- The essentials of engineering drawing and the properties of various materials such as metals, ceramics and polymers used by engineers. A brief introduction to CAD and CAM is also covered.

For students following degrees in Electrical and Electronic Engineering:
- Maths, focusing on knowledge, understanding and skills applicable to first year degree Engineering Mathematics, including algebra, functions, matrices, sequences and series, scalars and vectors, polar coordinates, calculus and probability.
- The principles of basic electrical circuits and the properties and practical applications of components.
- Electric fields, magnetic fields and the laws of electromagnetic induction.
- Practical electronics including logic circuits, arithmetic circuits, flip-flops and counters.
- Software design and development.

Studied Pre-Master’s – Business

“The Pre-Master’s helped me to understand the challenges that I will face in my Master’s. It was an excellent way for me to get used to the UK and familiarise myself with the academic framework. The support that tutors and staff at the ISC gave me really helped as I was able to take my time to build up my confidence and self-belief. I made the right choice in coming here and would recommend it to anyone who is nervous about starting a Master’s.”
Specialist preparation for your Master’s degree

The Pre-Master’s is a two-term programme of academic subjects, study skills and English language training that is specifically designed to meet the needs of international students. You will gain the specialist skills and knowledge you need to succeed in your Master’s degree at the University.

Study structure
You can choose between two routes:

- Art and Design
- Business

All routes are modular in structure with core modules common to each route, and route-specific modules designed to focus on the academic area most useful to your chosen degree.

Progression to your Master’s degree
Once you successfully complete the programme, and achieve the required grades, you will be fully prepared for studying your postgraduate degree at the University. You will gain:

- A range of academic and learning skills, which you may not have previously experienced in your home country.
- The ability to adapt to a new cultural environment and thrive academically.
- The right academic qualifications and a substantial understanding of the subject.
- The ability to use English in the academic environment and to a high standard.

English language training
To study the Pre-Master’s you will need an IELTS of 5.5 (minimum 5.5 in all skills). If you have an IELTS level of 5.0 (in all skills) or equivalent, you can take one term of English for Pre-Master’s (EPM) prior to starting your course. If you have an IELTS level of 4.5 (4.5 in all skills) or above, or equivalent, you will need to study two terms of English for Pre-Master’s before starting your course.

Key facts

Course start dates
January, April or August.

Course length
Two terms: January to June, April to August or August to December.

For more information, including term dates, country-specific entry requirements and tuition fees, visit hud.ac.uk/isc.

Yu CHINA

Pre-Master’s – Art and Design

“I chose to study at Huddersfield as the standard of design is very high. When I return home, I want to be able to contribute in this field to improve the quality of design.

“The teachers at the International Study Centre are really patient and friendly and the programme is giving me the right preparation for my Master’s. I am enjoying learning with students from other cultures.”

Leads to a postgraduate degree in:

- Digital Media MA
- Fashion Textile Practices MA
- Graphic Design MA
- International Fashion Management MA
- Sustainable Architecture MA

These degrees are subject to change

Engaging and inspiring

The School of Art, Design and Architecture at Huddersfield has an engaging and inspiring environment where you will benefit from high-quality teaching and access to industry-leading facilities. You will also benefit from high-profile, world-leading input into your course which is supplemented by industry placements.
Modules

Pre-Master’s English and Skills for University Study 2 and 3 (PMESUS)*
Over these two modules you will develop your English communication skills and learn a range of study skills, including: writing and reading strategies, presentation and seminar participation, organisation of time and materials, meeting deadlines and responding to feedback.

When you have completed these modules you will be able to effectively take notes and write essays in English, give presentations, answer follow-up questions and contribute to seminar discussions.

Art and Design

Over two terms you will study modules that include the following specialist Art & Design subjects up to Level 6 that will allow you access to a wide range of progression degrees:

- Research a chosen subject specialism, its nature, scope and practice within the UK and within the University. You will use planning and project management tools to organise studies and projects to be undertaken in subsequent modules.
- Undertake an extended research-led creative investigation into a subject specific area within the disciplines of Art and Design.
- Apply and collect a variety of data and materials relevant to your subject area and understand the limitations of data collection techniques.
- Undertake a case study that will demonstrate appreciation and understanding of the wider business and professional context of your chosen discipline.

* Students taking the English for Pre-Master’s programme will be required to take an IELTS exam and achieve 5.5 in each skill before being able to progress to the Pre-Master’s.

Portfolio

Students no longer need to complete a portfolio as part of their application to the Pre-Master’s programme. You will instead complete a portfolio as part of the Creative Arts route and will be assessed at the end of the programme.**

** Progression to your degree is dependent on passing the Pre-Master’s Programme and the portfolio. Students who do not pass the portfolio may be offered an alternative progression degree.
You can study an exciting range of Master’s degrees after completing your Pre-Master’s in Art and Design.

**Digital Media MA**
The MA in Digital Media offers continuing or recent graduates from creative design degree programmes an opportunity to enhance their knowledge, skills, creativity and employment prospects through imaginatively exploring Digital Media platforms and processes. There is a huge and exciting range of opportunities, both nationally and internationally, for ‘creative producers’ in media and both emerging and traditional technologies. Innovative, eclectic, creative thinkers and practitioners can make a statement in many areas of life and industry.

**Fashion Textiles Practices MA**
The course is one of a suite of Master’s programmes within the School of Art, Design and Architecture and thus offers a multi-disciplinary and international approach to Fashion Textile Practices. We encourage exploration in the fields of fashion design, 3D design technologies for surface or textiles, creative pattern cutting, the art of moulage, embroidery, experimental toiling, woven textiles, knitted textiles, textile surfaces, future materials, and site-specific textile art. You will also work alongside students from related disciplines as well as undertaking subject-specific modules in Fashion and Textile Concepts and Fashion and Textile Processes leading to a Major Project.

**Graphic Design MA**
The MA in Graphic Design offers continuing or recent graduates from creative design degree programmes an opportunity to enhance their knowledge, skills, creativity and employment prospects through imaginatively exploring Graphic Design platforms and processes. The expectation is that you will seek to enter the sector into roles such as a graphic designer, art director, graphic artist, graphic product developer or advertiser, or develop proposals for further postgraduate research. The course is one of a suite of Master’s programmes within the School of Art, Design & Architecture and thus offers a multi-disciplinary and international approach to Graphic Design. You will work alongside students from related disciplines as well as undertaking subject-specific modules in Graphic Design Concepts and Graphic Design Processes leading to a Major Project.

**Sustainable Architecture**
The course has a very distinct ethos based around the theme of environmentally sensitive building design. The aim is to provide you with skills and understanding that would enable you to take a leading professional and specialist role. It is also driven by the following key underlying themes that apply across all our architecture courses:
- Critical regionalism;
- Sustainability;
- User Centred Design; and
- Professional Development

Environmental issues rank at the very highest levels in the concerns of the general public and are particularly affected by the impact of the design and construction industry. The scale of influence ranges from building to urban dimensions. These are global problems requiring global and interconnected solutions and the course is designed to address issues from a world perspective. Issues are considered for different climate types and locations, giving a strong international dimension as well as providing opportunities to develop solutions that address local circumstances. The course is designed to give you the chance to acquire a mixture of skills and knowledge that would support roles as integrated and important members of design and construction teams. The course also provides opportunities to understand the specific needs of progression onto research degrees in the subject area.
Leads to a postgraduate degree in:

- Business MSc
- Business with Finance MSc
- Business with Human Resource Management MSc
- International Business Management MSc
- International Human Resource Management MA*
- International Marketing MSc
- Management MSc
- Management with Marketing MSc
- Marketing Communications MSc
- Master of Business Administration MBA*
- Risk, Disaster and Environmental Management MSc

*Only available for January and April intakes

Focus on employability

The Business School at Huddersfield works with top organisations and professional bodies to deliver courses which are highly focused on employability and career enhancement. Academic staff also have an excellent reputation in consultancy, research and other commercial activities.

These degrees are subject to change
Modules

Pre–Master’s English and Skills for University Study 2 and 3 (PMESUS)*
Over these two modules you will develop your English communication skills and learn a range of study skills, including: writing and reading strategies, presentation and seminar participation, organisation of time and materials, meeting deadlines and responding to feedback. When you have completed these modules you will be able to effectively take notes and write essays in English, give presentations, answer follow-up questions and contribute to seminar discussions.

Over two terms you will study modules that include the following specialist Business subjects up to Level 6 that will allow you access to a wide range of progression degrees:

Economics and Financial Analysis
This module provides you with an introduction to economic theories and systems and considers principally the macroeconomic environment in which businesses and other organisations operate. In addition this module will give you a basic grounding in financial and management accounting. The module will progress from the understanding of the basic financial statements through to interpretation and critical analysis of these in relation to prevailing external economic circumstances.

Research and Quantitative Methods
The aim of this module is to further develop your skills in the methods and techniques of research and your ability to write a substantive piece of academic work. You will be introduced to a variety of sources relevant to your specialist subject area and you will consider the application and limitation of techniques for understanding and interpreting qualitative and quantitative data. Although you will be introduced to the methods and techniques of empirical research, your project is likely to be based on secondary data sources.

The module will also cover common mathematical techniques for managerial decision-making which are used in many business environments.

On completing this module you will be able to demonstrate the practical application of research and quantitative methods to solve a realistic business problem and present your findings effectively.

Strategic and Operations Management
Success depends on a combination of a strategic vision, operational efficiency, process orientation, and the willingness of leaders to make difficult decisions to implement and manage change. In this module you will develop an understanding of, and the ability to apply, analyse and evaluate strategic models. You will also then critically consider how the key principles of operations management help bring strategy to fruition.

* Students taking the English for Pre–Master’s programme will be required to take an IELTS exam and achieve 5.5 in each skill before being able to progress to the Pre–Master’s.
Master’s degrees // Business

You can study a wide range of Master’s degrees after completing your Pre-Master’s in Business.

Business MSc
Designed to meet the needs of those who wish to develop cutting-edge business skills, this qualification is of real value to employers and is an ideal preparation if you are looking to move into senior management positions in the future.

Business with Finance MSc
The course is intended for graduates who have not previously studied business or management, who are interested in gaining a more in-depth qualification in Finance. It has been designed to offer you the opportunity to develop the business skills needed to aspire to management positions in any profession. The course helps prepare for a career in business management and leadership. It includes the advanced study of organisations, their management and the changing external context in which they operate.

Business with Human Resource Management MSc
This course is a generalist, conversion Master’s course. It has been designed to offer you the opportunity to develop the foundational business skills needed to aspire to management positions in any profession. The course helps prepare for a career in business management and leadership in the UK or overseas through development of appropriate skills at a professional or equivalent level. With dedicated modules in the field of Human Resource Management your degree award demonstrates specialized knowledge and skills in this area.

International Business Management MSc
This is a well-established course designed to meet the needs of students who wish to develop their subject specialism in international business management. You will develop the skills to identify the strategies available to firms operating at an international level. We encourage an understanding of the economics of the international environment as well as the ethical issues of operating across countries.

International Human Resource Management MSc
The overall aim of the course is to educate you as a Human Resource Manager in an international context and improve the quality of your professional development. You are encouraged to develop critical reflection and a range of skills and techniques specific to international human resource management. The course will focus on the development of relevant personal and interpersonal skills in preparation for a future professional career in people management, in a global workplace.

International Marketing MSc
Whether the global economy is flourishing or not, international markets are increasingly part of any marketing strategy. This course places particular emphasis on the international dimensions of marketing, both in terms of the need to adapt marketing strategies to international markets and also the practicalities of operating across different country markets.

Management MSc
This is a ‘conversion’ Master’s course and is ideal if you have not previously studied business or management and want to develop your knowledge and skills in these professional areas. It is particularly suitable for students from other subject areas who are intending to work in a business organisation and who would like to acquire professional management skills. You will cover all of the core areas of business including marketing, finance, operations, people management and strategy. There are also a wide range of options available to tailor study towards specific areas of interest. By choosing specific modules you may be eligible to obtain one of the following named awards:

- Business Project Management MSc
- Marketing Management MSc

You can specialise your studies further via the dissertation or project work.

Management with Marketing MSc
Marketing knowledge is essential in the private sector and increasingly important in public sector jobs. Combined with your management skills, this course enables you to offer future employers a strong portfolio of skills. The highlight of this course is the opportunity for you to study and research a topic area of your choice, either in the form of a dissertation or an Applied Consultancy Project. This will allow you to get real work experience and familiarise yourself with the work environment.
Marketing Communications MSc
With communication technologies developing at an unprecedented rate, managing the interface between a business and its customers is an exciting and challenging role for marketers. This course provides a comprehensive study of core marketing principles with a particular focus on key communications issues to prepare students for a career in marketing communications. Throughout the course, extensive use is made of real-world marketing and marketing communications.

Master of Business Administration MBA
The Huddersfield MBA is designed to provide the next generation of business leaders and entrepreneurs with the highest level of management education and personal development.

Studying for an MBA at Huddersfield will help you realise your ambitions, become a more effective manager, develop a strategic and global management perspective and improve your communication skills. Enabling you to achieve your personal goals, the qualification makes you a valuable asset to your organisation where you can quickly climb the career ladder. Alternatively, you may choose to use your MBA to redefine your ambitions and change your career direction.

Risk, Disaster and Environmental Management MSc
This course looks at all risks in the business environment together with a strong analysis of the consequences when things go wrong. Businesses and organisations increasingly need to anticipate the likelihood and consequences of unexpected events and the necessary short and long-term responses.

The programme is structured around three core management themes:

**Risk:** You will study a wide range of risks in business, organisational and geographical environments. You will learn to identify, assess and manage these risks.

**Disaster:** The disaster management element of the course will develop your ability to analyse the consequences when things go wrong, and will provide the practical skills for disaster prevention, preparedness, mitigation and management.

**Environment:** The course will help you understand how we interact with the natural environment and will explore how human activity can be managed to minimise negative environmental damage.
How to apply

You can apply to the University of Huddersfield International Study Centre through your local education agent or directly via our website. For full details of fees and our Terms & Conditions, please visit hud.ac.uk/isc

Application checklist and required documentation:
- Supporting document checklist
- Relevant academic transcripts
- Certificate of English
- Copy of passport
- References (where applicable)
- Copies of visas if you previously studied in the UK.

Apply via your local agent:
1. Your agent will help you complete an application form and advise you of our Terms & Conditions. Please ensure you understand them.
2. You will need to have supporting documents for scanning.
3. Your agent will receive an email from our admissions department confirming if you have been offered a place.

Apply online:
1. Visit the website and complete all sections of the online application form. Please read our Terms & Conditions carefully.
2. Upload your scanned supporting documents.
3. Save the completed form and simply await a decision from our Admissions Team.

IF YOU RECEIVE AN OFFER – YOU WILL BE GUIDED THROUGH THE NEXT STEPS:

Confirm
- Sign any confirmation documentation and academic declaration.
- Once we have received payment (details will be provided in your Offer Letter) your agent or Student Enrolment Adviser can assist you through the visa process.
- You have a legal right to cancel your place up to 14 days after acceptance of our offer of a place.

Before you arrive
Please notify us or your agent when you receive your visa.
We will then inform you / your agent about accommodation and any additional payments required.
Please ensure you have requested all original academic records to bring with you.
Please complete the online pre-arrival form.

When you arrive
Make sure you have the following essential items with you:
- Your passport
- Visa/Home Office letter
- CAS
- Offer Letter
- Accommodation documents
- Your qualification certificates
- A sponsor letter (if you are being sponsored)
- Passport-sized photographs
- Essential toiletries and medications.

*These items should be packed in your hand luggage.
We send a pre-arrival document to all students, so you should have everything you need to know. This can also be found on our website.
We look forward to welcoming you.
You must have personal insurance
It is essential that international students have the protection of personal insurance whilst in the UK. To cover you as a student at the International Study Centre (ISC), you may purchase our “Study Care” insurance cover. This policy will cover you for loss of personal possessions, travel delay, as well as providing medical insurance until the end of your ISC academic programme. You can purchase Study Care Insurance as part of your application process. If you prefer not to take out Study Care insurance, you must provide proof of alternative adequate insurance cover. For more information, please visit: hud.ac.uk/isc.

Contact us
Via your agent
Your agent will help you with any queries you may have and can guide you through our process or talk to our Admissions Department on your behalf.
